

WIA Adult Funds by Region and County, PY 2003 - PY 2005

The following chart shows historical funding levels for the new workforce regions. These are the best estimates that we have for the Program Year 2006 funding levels. As one can see these the funding does vary from year to year based on Indiana's allotment and the statistical data used for allocation within the state. We will not have better estimates until Indiana allotments are known and until the statistical data for in-state allocations is compiled. In addition, county level breakdowns were used to compile this report since counties were the best common entity between the workforce investment areas and the new workforce regions. The use of counties is not meant to imply that county allocations are to be used within the regions. In fact, allocations will be made to the new workforce regions with no county level stipulations. The funding is to be used for the development of the regions workforce.

County	WIB	PY 2003		PY 2004		PY 2005
